EXPERIENCE

Data Engineer Intern

April 2023 - Jun 2023

Loyaltytics.ai Consulting

I work with the team to ensure efficient data collection, processing, and storage, while gaining practical experience in the field of data engineering.

Frontend Developer

Nov 2022 - Mar 2023

I2E-Idea To Execution

Collaborated with web designers and back-end developers to ensure web applications meet customer requirements.

Web Developer Intern

Mar 2022 - May 2022

Tamboora (OPC) Private Limited

Developed web applications for clients across different industries and maintained code to ensure website security.

PROJECT

DrawTogether

- This application makes use of ~~Socket~~ Socket.IO to create a sample collaborative drawing app. Multiple users can draw rectangles and circles and all other users using the app see the changes.
- Socket.IO automatically allows the application to use WebSockets when it can, falling back to other Comet methods for other browsers.

Steganography

- The important goal of Projects on Steganography is to conceal the information in one to one communication.
- The Message that is retrieved should be same as the original message more amount of data should be hidden.
- Tech Stack-: (HTML, Java, PHP, SQL)

Place_Bharat-Web app

- Inter linked platform for Campus Placement in Higher educational Institutions of India. Create dashboards for a 360-degree view of students.
- Generate quick placement reports, and access placement data from anywhere.
- Tech Stack-: (HTML, Java, JavaScript, SQL)
